COVID-19 INFO

WHAT TO INCLUDE ON YOUR WEBSITE

Patients look to your practice website for the latest updates on COVID-19. Keeping your website up-to-date helps to ensure consistent messaging.

Helpful information to share with patients:

- The latest COVID-19 vaccine updates
- COVID-19 vaccine eligibility checker
- Where to go for COVID-19 testing in your local area
- Practice policies for entry e.g.
  - Screening questions
  - What happens if fail screening questions
  - Will there be a temperature check
  - Use of hand sanitiser
  - Notify if masks are required
  - 1 support person/carer only
- Official websites to visit for more information
- Considerations with timing for flu vaccine
- Provide answers to common questions and concerns patients may have
- Help patients feel more at ease about visiting the practice by knowing what to expect
- Expand messaging to Google My Business and social media accounts if applicable

## WHAT TO INCLUDE ON YOUR WEBSITE

How you can display essential information on your website

Website Popup

- Sits on top of existing content
- Must click to close it

Inline notification banner

- Sits within existing content
- Moves with existing content when you scroll

Floating banner or bar

- Usually positioned at very top or very bottom of page
- Is 'sticky' which means it's always visible
